

A DIFFERENT VIEW

© Belinda McArdle 2010

She kept some for herself then she passed a little on
She passed a little on - She passed a little on
She kept some for herself then she passed a little on
And the whole world turned upside down

She said no to your request then she passed a little on
Passed a little on - Passed a little on
She said no to your request then she passed a little on
And the whole world turned upside down
And they had a clearer view

*All the sisters and brothers and the busy and others
Could come undercover for a different view
For a different view*

He was weighted down with woes so he passed a little on
He passed a little on - He passed a little on
He was weighted down with woes so he passed a little on
And the whole world turned upside down

He felt compassion in his soul so he passed a little on
He passed a little on - He passed a little on
He felt compassion in his soul so he passed a little on
And the whole world turned upside down
And they had a clearer view

*All the sisters and brothers and the busy and others
Could come undercover for a different view
For a different view*

*All the sisters and brothers and the busy and others
Could come undercover for a different view
For a different view*
